

Name: _____

Date: _____

Flying Flames

Materials Needed:

- Printed flames – print on thicker paper (or double-sided) because the flame needs to be on the stiff side
- A straw – plastic straws are more durable
- Scotch tape
- Small strip of paper to make the launch cap

Instructions:

- Color in the flame and trim down to the edges
- Loosely roll a strip of paper around a straw. Seal it with Scotch tape at the middle and the top. This is the launch cap – similar to a pen lid. It should not be too tight. You could also make this with a slightly bigger straw.
- Tape the launch cap to the flame.
- Put the straw into the launch cap and blow – the flame should fly into the air.
